EDUCATION

Dronacharya College Of Engineering, Gurugram, Haryana

Aug 2023 – Present

Bachelor Of Technology

CGPA:- 7.90

EXPERIENCE

Python Development Intern

Jun 2025 – Jul 2025

Cognifyz Technologies

New Delhi, Delhi

- Developed Python automation and data processing scripts for backend workflows
- Integrated REST APIs and handled JSON-based data operations efficiently
- Performed web scraping and data analysis using Pandas and NumPy
- Worked on scalable backend logic and API response handling
- Improved data processing efficiency and automation workflows

Industrial Trainee

Jun 2025 – Jul 2025

Bellsonica Auto Component India Pvt.Ltd

Manesar, Haryana

- Built an Inventory Management System using Python and MySQL
- Automated stock tracking, reporting, and inventory monitoring processes
- Improved inventory data organization and operational workflows
- Developed backend functionalities for data storage and retrieval

PROJECTS

Insurance Comparison System | *Python, FastAPI, PostgreSQL, REST APIs* **April 2026 – May 2026**

- Developed an insurance comparison platform using Python, FastAPI, and PostgreSQL
- Built REST APIs for policy management and insurance comparison features
- Created recommendation-based endpoints using FastAPI for suggesting suitable insurance plans
- Optimized PostgreSQL queries and tested APIs for scalability and integration

Healthcare Appointment System | *React, Python, PostgreSQL*

May 2025 – June 2025

- Developed a full-stack healthcare appointment system using React for frontend and Python for backend development
- Built REST APIs for appointment booking, patient records, and doctor management
- Implemented authentication, appointment scheduling, and interactive frontend features using React
- Integrated PostgreSQL database for storing patient, doctor, and appointment data

Crash Guard AI | *Python, JavaScript, React.js, FastAPI, Scikit-learn, SQLite*

Aug 2026 – Present

- Developed an AI-powered accident detection and emergency response platform.
- Implemented automated emergency alerts using AI/ML-based accident detection.
- Built APIs and location-based features to identify nearby medical facilities.

TECHNICAL SKILLS

Languages: Java, Python, C/C++, SQL, PostgreSQL, JavaScript, HTML, CSS, R

Frameworks: React, Node.js, Flask, FastAPI

Developer Tools: Docker, Google Cloud Platform, VS Code, Eclipse, Pycharm, Jupyter Notebook

Libraries: Pandas, NumPy, Matplotlib, Scikit-learn, BeautifulSoup

AI/ML: Machine Learning, Deep Learning, Artificial Intelligence

CERTIFICATION

- Deloitte Australia - Data Analytics Job Simulation
- Tata - GenAI Powered Data Analytics Job Simulation
- Academy Accreditation - AI Agent Fundamentals
- Web Development Fundamentals
